Cerificate

Vice Dean, Professor Michaela Aschan has been the founder of High North Academy (HNA) on behalf of BFE faculty. She initiated and planned and teaches the course in Philosophy and Ethics of science FSK-8603 (HNA) now SVF-8600 (BFE). She is the scientific leader of the HNA course Funding your research FSK-8005 that she developed in cooperation with Petter Olsen (Nofima) and me in 2016.

The courses are developed in a conscious process where teachers attend each other's lectures and share the seminar work. Course evaluations are done in a final meeting with the students at end of the course and through quest back. This includes evaluations of each teacher. A teacher meeting evaluates the course, discusses improvements on the course in general and each teacher in particular. The courses are then improved according to final conclusions. Michaela initiated this practice and has participated in the implementation.

A handwritten signature in blue ink, appearing to read "Arve Lynghammar", written over a dashed horizontal line.
